

Super Science Programs for Kids

Presents

Legos, Robotics, Make & Take STEM for Kids

Held at Hamburg Elementary School

30 Linwood Avenue

Hamburg, NJ 07419

July 23-27, 2018

9:00 a.m. – 2:50 p.m. Daily

Program Description: Move over Rube Goldberg! In our engineering camp, you will have fun integrating Science, Technology, Engineering, and Mathematics by building and designing a wide range of gadgets and inventive machines. This course is designed for those that really like to build and experiment! Our camp provides an atmosphere where kids that have similar interests can come together and focus on building and experimenting in a hands-on atmosphere. We will offer a huge selection of models in the program from the many different themes that Lego has to offer. We will also have fun building and programming with Ozobot, Lego Robotics, K'NEX, ZomeTool, and more. Students will invent and construct robotic creations from their own imagination that are designed to meet a wide array of interesting challenges throughout the week. These include our robot Olympics, Battle-Bot competition, robo-bowling, and tractor pull. This year we are proud to include a wide range of make & take projects in our program. All students will make and take home a catapult, a compass, slime, and much more.

Fee: \$185 full day or \$119 half day. (Half day will be from 9:00-12:00)

Name of Child: _____

Name of Parent(s) _____ Email: _____
